

Moch Rafi Adnan Setiadipura

Frontend Engineer | React · Next.js · TypeScript

Bandung, Indonesia (Remote, UTC+7) | rafisetiadipura@gmail.com | [+62 878-2551-5689](tel:+6287825515689) | [LinkedIn](#) | [GitHub](#)

PROFESSIONAL SUMMARY

Frontend engineer with 4 years of experience building and shipping production web applications with React, Next.js, and TypeScript across parking, travel, and e-commerce products. Led the frontend of an online Umrah transaction platform from V1 through a from-scratch V2 rebuild in under 2 months, and reached a #1 search ranking through technical SEO. Delivered a registration flow that securely processed 2,000+ transactions. Comfortable working remotely in cross-functional teams, mentoring developers, and turning Figma designs and broad client briefs into polished, responsive interfaces.

TECHNICAL SKILLS

Languages: TypeScript, JavaScript (ES6+), HTML5, CSS3, SASS

Frameworks & State: React, Next.js (App Router, v15/16), Redux, Zustand, SWR, React Hook Form

UI & Styling: Tailwind CSS, Shadcn UI, Material UI, Ant Design, Bootstrap, Framer Motion

Web & SEO: Technical SEO (JSON-LD, sitemaps, UTM tracking, Google Tag Manager), responsive design, Figma-to-code, REST API integration

Integrations: Xendit (payments), SendGrid (transactional email)

Practices & Tools: Git, CI/CD, Agile/Scrum, SOLID principles, code review, mentoring

Also familiar with: Node.js, Express, PostgreSQL, SQL, Python, Vitest

PROFESSIONAL EXPERIENCE

Software Engineer – Frontend Developer | PARKEE

Nov 2022 – Present

Jakarta Pusat, DKI Jakarta · Remote · Next.js (App Router), TypeScript, SendGrid

- Optimized web performance and Core Web Vitals by migrating from legacy Gatsby to **Next.js 14 App Router**, improving **Largest Contentful Paint (LCP) by 29% (from 2.1s down to 1.5s)** and maintaining responsiveness (TBT) **50% below** Google's strict threshold.
- Built a standalone webview for the Wuzz registration system that streamlined user onboarding and securely processed **2,000+ transactions**.
- Designed a dynamic email template system on **SendGrid** that automates transaction receipts and improves post-purchase communication.
- Refactored the codebase around **SOLID** principles, reducing technical debt and making modules easier to maintain and reuse in upcoming rollouts.
- Resolved performance bottlenecks in the internal CMS, cutting load times by an estimated **30% for internal operators**.

Software Engineer – Frontend Developer (Contract) | PT Muslim Seratus Satu

Aug 2024 – Dec 2025

Bandung, Jawa Barat (Remote) · Next.js 15, TypeScript, Material UI, Shadcn UI, SWR

- Led frontend architecture and development of an online Umrah transaction platform as part of an 8-person cross-functional team.
- Shipped V1 with **Next.js**, **Material UI**, and **SWR**, then rebuilt the product from scratch as V2 on **Next.js 15** and **Shadcn UI**.
- Matched Figma designs with **~95% pixel-perfect fidelity across the application**.
- Implemented technical SEO (UTM tracking, Google Tag Manager, sitemaps, JSON-LD), achieving a **#1 search ranking for the V2 platform**.
- Mentored a freelance frontend developer from month 7 onward, keeping delivery on pace and code quality consistent.

Software Engineer Intern – Frontend Developer | Gincode Nusantara

Feb 2020 – Dec 2021

Bandung, Jawa Barat · ReactJS, Ant Design, CSS

- Built the frontend of the Rentatoy platform with **ReactJS** and **Ant Design**, delivering a responsive and intuitive interface.
- Developed an interactive internal dashboard from scratch with a 4-person team using **ReactJS** and custom **CSS**.
- Created custom registration forms and user flows for Idepreneursclub, onboarding **500+ participants**.

SELECTED FREELANCE PROJECTS

Wedding Website SaaS | maruplanner.my.id

Freelance, 4 months · 2026

- Architected an end-to-end digital wedding platform using **Next.js (App Router), TypeScript, and PostgreSQL**, successfully managing **~500 invited guests** across multi-session event schedules with real-time RSVP tracking.
- Engineered an on-site QR code scanning system for instant guest check-in (**< 1-second verification**), eliminating front-desk queues and seamlessly synchronizing live attendance data to the organizer dashboard
- Designed a multi-tenant database schema using **Prisma ORM** featuring centralized AuditLog tracking to ensure data integrity, prevent unauthorized state alterations, and maintain full traceability for event operations.
- Built an invitation interface with mobile-first interactive with **Framer Motion** and **Tailwind CSS**, implementing seamless card-opening transitions, spring physics, and hardware-accelerated rendering optimized for iOS Safari and Android.

Yoorasarah E-Commerce | yoorasarah.com

Freelance, 6 months · 2025

- Built the frontend from scratch for a custom e-commerce platform, working in a 4-person team (backend, frontend, QA, UI/UX) on a solution that significantly reduces the administrative costs of relying on third-party marketplaces (Shopee, TikTok Shop).
- Integrated the **Xendit** payment gateway for a secure and reliable checkout experience.

Wedding Website Organizer | ginapanji.my.id/rafi

Freelance, 2 months · 2025

- Built an end-to-end custom wedding invitation platform in **TypeScript** with a guest RSVP management system (full CRUD), managing data for **350+ guests**.
- Designed tailored web animations in direct consultation with the couple, creating a personalized invitation experience and distribution system.

Portfolio Andreas | visiongoal.ch/en

Freelance, 2 weeks · 2025

- Built a responsive, high-performance portfolio landing page in **TypeScript**, translating broad client requirements into a polished interface without existing mockups, and delivered it in two weeks.

STP Aquaculture | stpquaculture.com

Freelance, 3 months · 2023

- Built the frontend of a corporate profile website with **Next.js (App Router), TypeScript, and Framer Motion**, adding interactive animations and parallax scrolling for an immersive experience.

LinkLSM.id

Freelance, 3 months · 2021

- Built a social media platform for organizations' public engagement with React and TypeScript, onboarding 135 organizations through a 5-step registration flow with comprehensive validation (**React Hook Form**).

AI & INDEPENDENT PROJECTS

AI Video Clipper System

Personal project

React, TypeScript, Node.js, Gemini CLI, FFmpeg

- Built a full-stack pipeline that uses AI to identify key moments in long-form videos and extract them into short, shareable clips.
- Developed the frontend and backend logic (with the assistance of Gemini CLI) so users can review, edit, and export AI-generated clips.

EDUCATION

Bachelor of Computer Science | Parahyangan Catholic University

SYNERGY Academy Bootcamp | Back-end Development

Jan 2022 – Jun 2022

- Designed the RESTful API architecture for the final project “mager”; earlier built “filmen” with Express, Node.js, PostgreSQL, and CI/CD via Heroku.
